CAMPUS INTERVIEW

Profile 1: Frontend Developer

🌟 About Us: 🚀

GrowthJockey is a leading venture architect and marketing solutions provider at the forefront of innovation, with specialisations in AI, machine learning, and digital advertising. Our team of experienced engineers, marketers, and experts deliver dynamic solutions that drive measurable results for businesses of all sizes. We have built our own proprietary AI technology such as intellsys.ai and prediqs.ai. With expertise in incubating ventures, we've successfully incubated and launched over 25+ ventures for Fortune 500 companies, demonstrating our commitment to driving technological evolution and fostering industry leaders. Our dedication to staying ahead of the curve ensures that we provide our clients with nothing but the best in terms of technology and services. 🌟📈💡

J.D/Profile to be offered in detail:

Frontend developers at Growth Jockey are tasked with crafting, implementing, and deploying comprehensive web applications, spanning from the user-facing interface to the underlying server logic. Your role necessitates adeptness in various programming languages and frameworks, notably HTML, CSS, and JavaScript, along with proficiency in modern libraries like ReactJS and AngularJS. As part of the onboarding process, you'll undergo training to enhance both technical and interpersonal skills, aligning with predefined proficiency levels outlined in the Expectation Framework. This training encompasses mastering organizational tools and methodologies, as well as refining communication skills to meet company standards.

📌 Responsibilities:

- Collaborate with the design and development teams to translate wireframes and mockups into responsive and interactive user interfaces.
- Write clean, efficient, and maintainable code using HTML, CSS, and JavaScript.
- Implement best practices for front-end development to ensure optimal performance, accessibility, and cross-browser compatibility.
- Continuously optimize user interfaces for maximum speed and scalability.

GROWTH JOCKEY PRIVATE LIMITED
Corporate office: 10th Floor,Signature tower,sec-30, Gurugram, Haryana 122001
Website: www.growthjockey.com Email: hr@growthjockey.com

- Stay updated with the latest trends and technologies in front-end development and integrate them into our projects.
- Conduct thorough testing to identify and fix UI/UX issues before deployment.
- Participate in code reviews and provide constructive feedback to peers.

🎓 Requirements:

- Bachelor's degree in Computer Science, Software Engineering, or related field.
- Strong understanding of HTML5, CSS3, and JavaScript.
- Familiarity with modern front-end frameworks/libraries such as React, Angular, or Vue.js is a plus.
- Basic knowledge of version control systems (e.g., Git).
- Excellent problem-solving skills and attention to detail.
- Ability to work effectively both independently and as part of a collaborative team.
- Passion for learning and staying updated with emerging technologies in the field of web development.

Profile 2: Backend Developer (Fresher) 💻

🌟 About Us:

<u>**J.D/Profile to be offered in detail:**</u>

Backend developers at Growth Jockey are entrusted with designing, developing, and deploying the core logic and functionality of web applications. This encompasses server-side programming, database management, and system integration. Your role demands proficiency in programming languages such as Node.js, PHP, and Python, along with expertise in database systems like MySQL, MongoDB, and PostgreSQL. During onboarding, you'll receive training to bolster technical prowess and behavioural competencies in accordance with defined proficiency levels outlined in the Expectation Framework. Additionally, you'll gain familiarity with organisation-specific tools and methodologies, while honing communication skills to excel within the company's standards.

📌 Responsibilities:

- Collaborate with the development team to design, develop, and deploy scalable backend solutions.
- Write clean, efficient, and maintainable code using programming languages such as Python, Java, or Node.js.
- Design and implement RESTful APIs for seamless communication between the frontend and backend systems.
- Integrate third-party services and APIs to enhance the functionality of our applications.
- Develop and maintain databases, ensuring optimal performance, reliability, and security.
- Implement authentication and authorization mechanisms to protect sensitive data.
- Conduct thorough testing of backend systems to identify and fix bugs and performance issues.
- Work closely with cross-functional teams to understand requirements and deliver high-quality solutions.

🎓 Requirements:

GROWTH JOCKEY PRIVATE LIMITED
Corporate office: 10th Floor,Signature tower,sec-30, Gurugram, Haryana 122001
Website: www.growthjockey.com Email: hr@growthjockey.com

- Bachelor's degree in Computer Science, Software Engineering, or related field.
- Strong understanding of object-oriented programming concepts.
- Proficiency in one or more backend programming languages (e.g., Python, Java, Node.js).
- Familiarity with databases such as MySQL, PostgreSQL, or MongoDB.
- Basic knowledge of web development frameworks (e.g., Django, Spring Boot, Express.js).
- Experience with version control systems (e.g., Git) is a plus.
- Excellent problem-solving skills and attention to detail.
- Ability to work effectively both independently and as part of a collaborative team.
- Passion for learning and staying updated with emerging technologies in backend development.

🚀 Perks & Benefits:

- Competitive salary package
- Flexible working hours
- Opportunities for career advancement
- Stimulating work environment with opportunities for innovation
- Health and wellness programs
- Team-building activities and social events

If you are a proactive and ambitious individual with a passion for backend development, we want to hear from you! Join us and be a part of our journey to reshape the digital landscape with groundbreaking solutions.

Profile 3: Data Scientist 💻

🚀 Company Overview:

GrowthJockey is a venture architect that leads the charge in building cutting-edge, technology-led digital startups for large enterprises. We are at the forefront of AI, machine learning, and digital transformation. With a team of dedicated experts, we deliver dynamic solutions that produce measurable results for businesses of all sizes.

Our proprietary AI infrastructure, intellsys.ai, is an advanced AI AdTech platform that leverages over 100 proprietary AI models to revolutionize marketing optimization for startups and global enterprises alike.

With over 25+ ventures successfully incubated and launched for Fortune 500 companies, we are committed to driving the future of technology and shaping industry leaders. Join us on our journey to foster innovation and elevate businesses through data and AI!

🌟 Role Overview:

As a Data Scientist - Fresher, you will have the opportunity to dive into data, collaborate with top industry professionals, and learn how to use cutting-edge machine learning and AI techniques. This role will allow you to explore real-world problems, work with large datasets, and build solutions that directly impact business strategies.

🎯 Key Responsibilities:

- Assist in collecting, processing, and analyzing large datasets to derive meaningful insights.
- Work with senior data scientists to develop and train machine learning models that drive business decisions.
- Contribute to the design and implementation of data pipelines for continuous analysis and model development.
- Support cross-functional teams by providing data-driven insights and reports.
- Learn and apply various statistical techniques and machine learning algorithms under the guidance of experienced professionals.
- Build visualizations to communicate findings to both technical and non-technical stakeholders.
- Stay updated with emerging data science trends and techniques to bring innovation into your work.
- Collaborate with mentors to continuously improve skills and tackle new challenges.

GROWTH JOCKEY PRIVATE LIMITED
Corporate office: 10th Floor,Signature tower,sec-30, Gurugram, Haryana 122001
Website: www.growthjockey.com Email: hr@growthjockey.com

✨ Requirements:

Bachelor's degree in Computer Science, Statistics, Mathematics, or a related field.

- Basic programming skills in Python or R, with exposure to data analysis libraries such as Pandas and NumPy.
- Familiarity with machine learning algorithms and frameworks like scikit-learn or TensorFlow.
- Strong problem-solving mindset with a passion for working with data.
- Basic understanding of statistical concepts, hypothesis testing, and data visualization.
- Good communication skills and the ability to work in a team environment.
- Eagerness to learn and apply new techniques to real-world challenges.

Profile 3: Data Engineer 💻

🚀 Company Overview:

GrowthJockey is a venture architect that leads the charge in building cutting-edge, technology-led digital startups for large enterprises. We are at the forefront of AI, machine learning, and digital transformation. With a team of dedicated experts, we deliver dynamic solutions that produce measurable results for businesses of all sizes.

excellent opportunity for a fresher who is passionate about data and eager to develop their skills in data engineering.

Key Responsibilities:

- Assist in designing, developing, and maintaining scalable data pipelines.
- Help manage, optimize, and tune data systems and databases.
- Support the data ingestion processes from multiple data sources (structured and unstructured).
- Work with cross-functional teams to understand data requirements and ensure data accuracy and availability.
- Perform data extraction, transformation, and loading (ETL) processes.
- Assist in building and maintaining ETL frameworks to integrate data from various sources.
- Ensure data security, integrity, and accuracy in all processes.
- Assist in developing data models and database designs to meet business requirements.
- Monitor and troubleshoot data pipelines and related infrastructure.
- Document processes, code, and data systems.

Skills & Qualifications:

- Bachelor's degree in Computer Science, Engineering, Information Technology, or a related field.
- Strong understanding of database management systems (SQL, NoSQL).
- Knowledge of data processing frameworks and tools (e.g., Hadoop, Spark, Kafka) is a plus.
- Familiarity with ETL processes and data pipeline development.
- Proficiency in programming languages such as Python, SQL, or Scala.
- Basic understanding of cloud technologies (e.g., AWS, Azure, GCP) is an advantage.
- Strong problem-solving and analytical skills.
- Good communication and teamwork skills.
- Eagerness to learn and grow in the field of data engineering.
